

Terms of Service (v5)

Version 5 — published on 5 October 2026

1. Nature of the Service

This service is an automated arbitrage algorithm operating on Polymarket. It does not constitute investment advice or a regulated financial service. The operator is not a licensed financial institution.

2. Risks and Capital Loss

Trading involves the risk of partial or total loss of your funds. Past performance does not guarantee future results. You may lose your entire deposit. Only deposit what you can afford to lose entirely.

3. Disclaimer of Liability

The operator disclaims all liability for:

- Financial losses, regardless of cause
- Technical malfunctions, bugs, or service interruptions
- Unavailability of Polymarket or blockchain networks
- Errors in order execution
- Hacking, security breaches, or unauthorized access
- Any force majeure event

4. No Guarantees

The service is provided "as is", with no guarantee of performance, availability, or results. No minimum return is promised or guaranteed.

5. Fees

Transaction fees apply to each buy operation. A performance commission may be charged on realized profits. Referral fees apply where applicable.

6. Deposits & Withdrawals

Deposits in USDC (Polygon) or by card. Minimum withdrawal \$5. Withdrawals require pausing trading. Processing times depend on the blockchain network.

7. Pooled Funds

Your funds are pooled with other users' funds. PnL is distributed proportionally to your pool share. You bear the proportional risk of loss.

8. Personal Data

We collect your Telegram ID, username, language, and registration date for service management. This data is not shared with third parties.

9. Suspension and Termination

The operator reserves the right to suspend or terminate any account without notice in case of abuse, fraud, or violation of these Terms.

10. Modifications

These terms may be modified at any time. Any modification will be notified. Continued use constitutes acceptance.

11. Applicable Law

These Terms are governed by the law applicable to the operator's headquarters. Any dispute shall be submitted to the competent courts.

12. Discretionary Management Mandate

1) Purpose. By accepting these Terms and depositing funds into their Neural Bet account, the User grants Neural Bet an express, exclusive and discretionary mandate to allocate, invest and manage the deposited funds with the objective of generating returns. This mandate authorizes Neural Bet to take, without prior consultation or approval from the User, any decision regarding investment, arbitrage, allocation, conversion between digital assets, or the opening and closing of positions on the platforms and markets Neural Bet deems appropriate.

2) Scope of powers. Neural Bet freely determines: (i) the trading strategies implemented, including automated arbitrage strategies; (ii) the platforms, markets and instruments used; (iii) the size, frequency and duration of positions; (iv) the allocation of funds across identified opportunities. The User acknowledges that decisions are made automatically by Neural Bet's algorithms and that no individual validation of operations will be requested.

3) No guarantee. This mandate is an obligation of means, not of result. Neural Bet guarantees neither returns nor preservation of the invested capital. The User acknowledges that trading digital assets carries a high risk of loss, up to the total loss of deposited funds, and declares investing only amounts whose loss would not affect their financial situation.

4) Duration and revocation. The mandate takes effect upon the first deposit and remains in force as long as funds are entrusted to Neural Bet. The User may revoke it at any time by requesting the withdrawal of all their funds, subject to the unwinding of open positions, carried out as promptly as possible and in the User's best interests.

5) Reporting. Neural Bet provides the User, through the application, with a view of their portfolio value and the history of operations carried out on their behalf.

13. Automatic Transfer Mandate

By accepting these terms, you authorize the automatic transfer, for an unlimited duration, of USDC/USDT received on your Neural wallet to the operator's operational wallet, for the purpose of crediting and deploying your balance. This authorization may be revoked at any time. Revocation affects neither funds already transferred nor your existing balance, but suspends any new top-up until re-authorization.

14. Acceptance

By clicking "I accept", you acknowledge that you have read, understood, and accepted these Terms in their entirety. You acknowledge acting with full knowledge of the risk of total loss of your funds.
